## HOLLIDAY ROCK - NEW OFFICES

Upland, CA – Holliday Companies recently moved to their brand new 13,800 square foot facility in Upland, California. The state-of-the-art, two-story concrete tilt-up was constructed using 15 panels, the lightest weighing 47,651 lbs and the heaviest weighing 112,578 lbs. The building is 35 feet tall and the construction consisted of 1,114 yards of concrete. The building was built by RC Construction Services out of Rialto, California. The interior was designed and decorated by Corporate Spaces out of Pasadena, California. The building boasts polished concrete floors as well as a stamped & stained concrete lobby floor. The specialized concrete work was constructed by Peterson Brothers Construction of Brea, California. The facility also has a 30+ person capacity training room. Some of the amenities in the new offices are flat screen televisions in the lobby, break

rooms, asphalt dispatch offices and ready-mix dispatch offices. The facility utilizes CCTV which enables dispatch to see all of Holliday Rock's plants live. The landscape was planned using drought tolerant plants and materials.

The 35-plus employees who now work out of the new facility are thrilled to be in the new offices, they had out grown their old office and it was in need of constant repairs. Tim Kranz, John Williams and Aimee Wheater worked countless hours during the design, construction and decorating phases of the building to ensure everything went smoothly as planned.

The first level features photography by employee George Smith that gives you a unique, and sometimes unexpected look at the equipment and facilities that Holliday owns and operates. This move also enabled Holliday Rock to consolidate offices such as

Environmental, Quality Control, Dispatch and IT (Information Technology).

The new office is located at 1401 N. Benson Ave., Upland, California, 91786. Their phone number has remained the same 909-982-1553.
