

How to create a fast Drupal module

how does programming help us

This tutorial will show how to create a Drupal Block Module. We will discuss the Twitter widget converting a custom module, as well as discuss some basic development techniques in Drupal Module.

First of all, it is recommended to have some knowledge of PHP and Drupal. If you are interested in creating more Drupal modules, I beg you to check the Drupal API and the documentation pages. However, one thing I noticed is that WordPress and Drupal have a very similar way to process things to which I will indicate.
